

AI NEURO IMAGING CENTER

MRI BRAIN RADIOLOGY REPORT

Doctor: dr raj

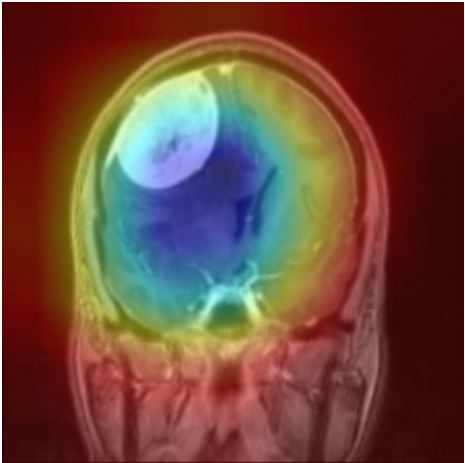

PATIENT DETAILS

Patient Name	anu
Age	Unknown
Blood Group	A-
Gender	Female
Date	24-06-2026

AI MEASUREMENTS

Tumor Type: Meningioma
Model Confidence: 97.86%
Risk Category: High
Estimated Tumor Size: 4.50 cm

Tumor Localization

KEY FINDINGS

- Well-defined extra-axial lesion noted.
- Imaging features suggest benign meningioma.
- Estimated tumor size: 4.50 cm.
- Clinical risk category: High

IMPRESSION

Large tumor with significant clinical risk requiring urgent medical evaluation.

SUGGESTIONS

- Correlate findings with clinical symptoms
- Recommend contrast-enhanced MRI for detailed evaluation
- Consult neurosurgeon or neurologist for treatment planning
